EIN: 95-4453134 · **Report date:** 2026-06-07 · **Data as of:** 2026-03-15

Your GMG Score: 100/100 · Impact 37/50 · Alignment 44/50 · Risk deduction -0

Why you're receiving this

Good Measure Giving (goodmeasuregiving.org) is a charity-evaluation platform for Muslim donors. Your organization is evaluated from public data, and donors use the resulting score to decide where to give. This report shows you exactly what donors see: where every data point came from, the full scoring rubric, and — most usefully — the specific gaps between your current score and the points available to you. Every gap below is closable with information you control.

Where our data comes from

Every figure in this report traces to a public source. The table below lists each data point, where we read it, and when. If anything here is wrong or stale, the correction process at the end of this report exists exactly for that.

ORDER OF PRECEDENCE WHEN SOURCES DISAGREE

<u>Data domain</u>	<u>Precedence (first wins)</u>
<u>Financial data (revenue, expenses, assets)</u>	<u>IRS Form 990 (ProPublica) → Charity Navigator</u>
<u>Third-party ratings</u>	<u>Charity Navigator only</u>
<u>Programs & mission</u>	<u>Candid → your website → Charity Navigator</u>
<u>Transparency signals</u>	<u>Candid → Charity Navigator</u>

<u>Zakat acceptance</u>	<u>Your website only — explicit evidence required (a zakat page, fund, or policy); inferred claims are rejected</u>

[Fields known to be unreliable when read by automated extraction \(zakat claims, beneficiary counts, external evaluations, scholarly endorsements\) additionally require corroborating evidence before they affect any score — an uncorroborated claim is treated as absent, never guessed.](#)

All values, all sources — including where they disagree

[We read multiple sources, and they don't always agree — different fiscal years, stale profiles, or genuine errors. Rather than hide that, the matrix below shows every value from every source. Conflicts are marked △; the order-of-precedence table above determines which value we use.](#)

[Financial figures that differ across sources usually reflect different filing years \(see the Tax / fiscal year row\) rather than errors — each source updates on its own schedule. Where a conflict is not a fiscal-year artifact, the correction process at the end of this report applies.](#)

The scoring rubric, in full

[We publish the rubric in full so nothing about your score is a black box. Rubric version 5.0.0; the same rules apply to every organization in our database.](#)

IMPACT — 50 POINTS, WEIGHTED FOR YOUR ARCHETYPE: DIRECT SERVICE

[Organizations delivering direct humanitarian aid, medical services, or basic needs. Impact weights vary by archetype so that, for example, an advocacy organization is not graded on meals served. Your weights:](#)

<u>Component</u>	<u>Weight (max points)</u>	<u>You scored</u>
<u>Cost Per Beneficiary</u>	<u>13</u>	<u>4</u>
<u>Directness</u>	<u>5</u>	<u>5</u>
<u>Financial Health</u>	<u>7</u>	<u>4</u>
<u>Program Ratio</u>	<u>5</u>	<u>4</u>
<u>Evidence & Outcomes</u>	<u>5</u>	<u>5</u>
<u>Theory of Change</u>	<u>5</u>	<u>5</u>
<u>Governance</u>	<u>10</u>	<u>10</u>

Governance carries a 10-point floor in every archetype.

ALIGNMENT — 50 POINTS, FIXED WEIGHTS FOR ALL ORGANIZATIONS

<u>Component</u>	<u>Max</u>	<u>How points are earned</u>
<u>Muslim Donor Fit</u>	<u>19</u>	<u>Layered: explicit zakat program +4 (or accepts zakat +2), Muslim-focused organization +2, Islamic identity +1, serving a named asnaf category +5, operating in Muslim-majority regions +3, humanitarian service +4. Capped at 19.</u>
<u>Cause Urgency</u>	<u>13</u>	<u>Fixed points by cause area (humanitarian relief highest), from your detected primary category.</u>
<u>Underserved Space</u>	<u>7</u>	<u>Serving populations or geographies with limited nonprofit coverage.</u>
<u>Track Record</u>	<u>6</u>	<u>Years of operation, smoothly interpolated.</u>
<u>Funding Gap</u>	<u>5</u>	<u>Smaller organizations with greater funding gaps score higher.</u>

RISK — DEDUCTIONS UP TO -10

<u>Trigger</u>	<u>Deduction</u>	<u>Source we check</u>
<u>Program expense ratio below 50%</u>	<u>-5</u>	<u>IRS Form 990</u>
<u>Board smaller than 3 members</u>	<u>-5</u>	<u>Form 990 / Candid</u>
<u>Operating reserves under 1 month</u>	<u>-2</u>	<u>Form 990</u>

Deductions are size-adjusted: emerging organizations (<\$1M revenue) are not penalized for *missing* data, while established organizations (>\$10M) receive full deductions. Operating in conflict zones is never penalized.

DATA CONFIDENCE — 0 TO 1, DISPLAYED BESIDE THE SCORE

Verification 50% (third-party evaluation by Charity Navigator/Candid), transparency 35% (Candid seal level, audited financials), data quality 15% (consistency across sources). This is not part of the 100-point score — it tells donors how much verified information sits beneath it.

Your Impact scorecard

<u>Component</u>	<u>Your score</u>	<u>Status</u>	<u>What we saw</u>
<u>Cost Per Beneficiary</u>	<u>4/13</u>	<u>Missing data</u>	<u>No beneficiary data available for cost-per-beneficiary scoring; good program ratio ($\geq 75\%$) suggests reasonable delivery</u>

<u>Governance</u>	<u>10/10</u>	<u>Strong</u>	<u>Board governance: ADEQUATE (5 members)</u>

Your Alignment scorecard

<u>Component</u>	<u>Your score</u>	<u>Status</u>	<u>What we saw</u>
<u>Muslim Donor Fit</u>	<u>19/19</u>	<u>Strong</u>	<u>Explicit zakat program (+4); Muslim-focused organization (+2); Islamic identity (+1); Asnaf: fuqara (+5); Operates in Muslim-majority regions (+3); Strong humanitarian service (+4)</u>
<u>Cause Urgency</u>	<u>13/13</u>	<u>Strong</u>	<u>Cause area: Humanitarian (13/13)</u>
<u>Underserved Space</u>	<u>3/7</u>	<u>Partial</u>	<u>Serves underserved populations (+3)</u>
<u>Track Record</u>	<u>6/6</u>	<u>Strong</u>	<u>Founded 1993 (33 years — 6/6)</u>
<u>Funding Gap</u>	<u>3/5</u>	<u>Strong</u>	<u>Revenue: \$147.2M (3/5 funding gap)</u>

Gaps to close

We identified **up to 12 points** of headroom, ranked by potential gain. The last column tells you exactly where our pipeline reads the evidence — if you already do these things but don't publish them there, publishing is the entire fix.

<u>Priority</u>	<u>Component</u>	<u>Currently</u>	<u>Potential gain</u>	<u>What to do</u>	<u>Where we'll read it</u>
<u>1</u>	<u>Cost Per Beneficiary (Impact)</u>	<u>4/13</u>	<u>+6</u>	<u>Publish beneficiary counts consistently so cost-effectiveness can be assessed.</u>	<u>Beneficiary counts on your website / annual report</u>
<u>2</u>	<u>Financial Health (Impact)</u>	<u>4/7</u>	<u>+3</u>	<u>If reserves are above policy target, document why and publish triggers for planned deployment.</u>	<u>IRS Form 990 (reserves) + a published reserve policy</u>
<u>3</u>	<u>Underserved Space (Alignment)</u>	<u>3/7</u>	<u>+3</u>	<u>Expand services to underserved populations or geographies with limited nonprofit coverage.</u>	<u>Program + geography descriptions on your website</u>

Risk deductions

No risk deductions — no governance red flags were identified.

Data confidence

Your data-confidence badge is **HIGH**. This sits outside the score itself — it tells donors how much verified information underpins your evaluation. The three signals:

<u>Signal</u>	<u>Level</u>	<u>Value</u>
<u>Verification (50%)</u>	<u>HIGH</u>	<u>1.00</u>
<u>Transparency (35%)</u>	<u>PLATINUM</u>	<u>1.00</u>
<u>Data quality (15%)</u>	<u>HIGH</u>	<u>1.00</u>

All three signals are at their maximum — donors see your evaluation as fully verified.

What's working in your favor

- Maintains a perfect Charity Navigator score of 100.0/100, reflecting exceptional accountability and transparency
- High operational efficiency with 80.3% of total revenue directed toward program expenses
- Strong financial stability with 18.0 months of working capital available

From our analysts

- Enhancing the directness of impact reporting to further increase the impact score from 37/50
- Optimizing fundraising efficiency beyond the current rate of \$0.19 per \$1 raised

Correcting or updating our data

Corrections follow a defined process, not an inbox black hole:

1. **Tell us what's wrong** — contact us via goodmeasuregiving.org with the data point, what it should be, and where the correct value is published.
2. **We triage into one of three lanes.** *We misread a source* → we correct the pipeline and re-crawl. *The data isn't public yet* → you publish it (the Sources table above shows where we read each field), then we re-run. *You dispute the methodology* → it's logged in our public issue tracker and considered for the next rubric version.
3. **Your evaluation is re-run end-to-end** — not hand-edited. Scores only ever come from the pipeline.
4. **Every change is version-controlled.** Our database keeps a full audit history of every value, every score, and every re-run — we can show you exactly what changed and when.

Re-evaluations are typically completed within two weeks of a verified correction.

This report is informational, generated from public data as of the date above. Scores change as data changes. The ZAKAT-ELIGIBLE tag records a verifiable public claim by your organization, not a fiqh ruling — zakat eligibility judgments belong to donors and the scholars they consult.
