Why you're receiving this

Good Measure Giving (goodmeasuregiving.org) is a charity-evaluation platform for Muslim donors. Your organization is evaluated from public data — your website, IRS Form 990 filings, Charity Navigator, and Candid — and donors use the resulting score to decide where to give. This report shows you exactly what donors see, how each component of your score was earned, and where points are available. Every improvement below is something within your control.

How the score works

- **Impact (50 points)** — program effectiveness, weighted by what kind of organization you are. We don't grade an advocacy organization on meals served.
- **Alignment (50 points)** — fit for Muslim donors: zakat clarity, cause urgency, underserved space, track record, funding gap.
- **Risk (up to -10)** — deductions for governance red flags (low program spending, very small board, low reserves).
- **Data Confidence (0-1, shown beside the score)** — how much verified information sits beneath the evaluation.

Where you can gain points

We identified **up to 12 points** of headroom, listed by potential gain. These reflect what our pipeline could verify from public sources — if you already do these things but don't publish them, publishing is the fix.

Priority	Component	Currently	Potential gain	What to do
1	Cost Per Beneficiary (Impact)	4/13	+6	Publish beneficiary counts consistently so cost-effectiveness can be assessed.
2	Financial Health (Impact)	4/7	+3	If reserves are above policy target, document why and publish triggers for planned deployment.
3	Underserved Space (Alignment)	3/7	+3	Expand services to underserved populations or geographies with limited nonprofit coverage.

Risk deductions

No risk deductions — no governance red flags were identified.

Data confidence

Your data-confidence badge is **HIGH**. This sits outside the score itself — it tells donors how much verified information underpins your evaluation. The three signals:

Signal	Level	Value
Verification (50%)	HIGH	1.00
Transparency (35%)	PLATINUM	1.00
Data quality (15%)	HIGH	1.00

All three signals are at their maximum — donors see your evaluation as fully verified.

How to update what we see

Our pipeline re-reads public sources on a recurring basis. To make improvements visible:

1. **Your website** — publish your zakat policy (if you accept zakat), program outcomes, beneficiary counts, board composition, and annual reports where a crawler can find them.
2. **Candid (GuideStar)** — keep your profile current; Gold/Platinum seals feed the transparency signal directly.
3. **Charity Navigator** — an up-to-date evaluation feeds the verification signal.
4. **IRS Form 990** — file on time; we read program ratios, reserves, and governance data from it.

Once you've made changes, contact us at goodmeasuregiving.org and we'll re-run your evaluation.

This report is informational, generated from public data as of the date above. Scores change as data changes. The ZAKAT-ELIGIBLE tag records a verifiable public claim by your organization, not a fiqh ruling — zakat eligibility judgments belong to donors and the scholars they consult.
