

Good Measure Giving Score Report: Islamic Society of Greater Houston

Good Measure Giving

June 7, 2026

Good Measure Giving Score Report: Islamic Society of Greater Houston

EIN: 23-7065716 · **Report date:** 2026-06-07 · **Data as of:** 2026-03-15

Your GMG Score: 34/100 · Impact 16/50 · Alignment 23/50 · Risk deduction -5

Why you're receiving this

Good Measure Giving (goodmeasuregiving.org) is a charity-evaluation platform for Muslim donors. Your organization is evaluated from public data, and donors use the resulting score to decide where to give. This report shows you exactly what donors see: where every data point came from, the full scoring rubric, and — most usefully — the specific gaps between your current score and the points available to you. Every gap below is closable with information you control.

Where our data comes from

Every figure in this report traces to a public source. The table below lists each data point, where we read it, and when. If anything here is wrong or stale, the correction process at the end of this report exists exactly for that.

Data point	Value we read	Source	Retrieved
Candid transparency seal	bronze	Candid	2026-03-09
Zakat acceptance claim	Yes	Charity Website	2026-03-07
Founded year	1969	Charity Website	2026-03-07
Audited financials	No	Charity Website	2026-03-07
NTEE classification	X40	ProPublica Form 990	2026-03-09
Transparency score	50	Candid Bronze Seal	2026-03-09

Zakat claim — the evidence we recorded:

In 2024, ISGH was among the largest providers of financial assistance in our community with over \$4.9M in Zakat and Sadaqah distributions. Additionally, their website offers 'Zakat-UI-Maal' as a specific online giving option, and they have a formal 'ISGH Assistance Application' for evaluating Zakat requests. (Source: https://isgh.org/assistance/SMARTPANTS_PRESERVED_127)SMARTPANTS_PRESERVED_128

External evaluations and recognitions we found: ISNA 2018 Green Masjid Award (Islamic Society of North America (ISNA)); Houston Mayor's Proud Partner Award (Houston Mayor's Office)

ORDER OF PRECEDENCE WHEN SOURCES DISAGREE

<u>Data domain</u>	<u>Precedence (first wins)</u>
Financial data (revenue, expenses, assets)	IRS Form 990 (ProPublica) → Charity Navigator
Third-party ratings	Charity Navigator only
Programs & mission	Candid → your website → Charity Navigator
Transparency signals	Candid → Charity Navigator
Cause classification	Candid → Charity Navigator → IRS NTEE → your website
Location	IRS Form 990 → Charity Navigator → Candid
CEO compensation	Charity Navigator → IRS Form 990 aggregate
Zakat acceptance	Your website only — explicit evidence required (a zakat page, fund, or policy); inferred claims are rejected

Fields known to be unreliable when read by automated extraction (zakat claims, beneficiary counts, external evaluations, scholarly endorsements) additionally require corroborating evidence before they affect any score — an uncorroborated claim is treated as absent, never guessed.

All values, all sources — including where they disagree

We read multiple sources, and they don't always agree — different fiscal years, stale profiles, or genuine errors. Rather than hide that, the matrix below shows every value from every source. Conflicts are marked △; the order-of-precedence table above determines which value we use.

<u>Field</u>	<u>IRS 990 (ProPublica)</u>	<u>Charity Navigator</u>	<u>Candid</u>	<u>Your website</u>	<u>Form 990 grants</u>
<u>Board size</u>	:	—	<u>2</u>	:	:
<u>IRS ruling year</u>	<u>2015</u>	—	<u>2015</u>	:	:
<u>Founded year (self-reported)</u>	:	:	:	<u>1969</u>	:
<u>NTEE code</u>	<u>X40</u>	:	<u>X40</u>	:	:
<u>Candid seal</u>	:	:	<u>bronze</u>	:	:
<u>Accepts zakat (explicit evidence)</u>	:	:	:	<u>Yes</u>	:

— = source has no value · · = source doesn't report this field

No conflicting values across sources for the fields above.

The scoring rubric, in full

We publish the rubric in full so nothing about your score is a black box. Rubric version 5.0.0; the same rules apply to every organization in our database.

IMPACT — 50 POINTS, WEIGHTED FOR YOUR ARCHETYPE: COMMUNITY

Community-serving organizations — congregations, social services, outreach. Impact weights vary by archetype so that, for example, an advocacy organization is not graded on meals served. Your weights:

<u>Component</u>	<u>Weight (max points)</u>	<u>You scored</u>
<u>Cost Per Beneficiary</u>	<u>6</u>	<u>0</u>
<u>Directness</u>	<u>5</u>	<u>4</u>
<u>Financial Health</u>	<u>7</u>	<u>0</u>
<u>Program Ratio</u>	<u>5</u>	<u>0</u>
<u>Evidence & Outcomes</u>	<u>10</u>	<u>2</u>
<u>Theory of Change</u>	<u>7</u>	<u>5</u>
<u>Governance</u>	<u>10</u>	<u>5</u>

Governance carries a 10-point floor in every archetype.

ALIGNMENT — 50 POINTS, FIXED WEIGHTS FOR ALL ORGANIZATIONS

<u>Component</u>	<u>Max</u>	<u>How points are earned</u>
<u>Muslim Donor Fit</u>	<u>19</u>	<u>Layered: explicit zakat program +4 (or accepts zakat +2), Muslim-focused organization +2, Islamic identity +1, serving a named asnaf category +5, operating in Muslim-majority regions +3, humanitarian service +4. Capped at 19.</u>
<u>Cause Urgency</u>	<u>13</u>	<u>Fixed points by cause area (humanitarian relief highest), from your detected primary category.</u>
<u>Underserved Space</u>	<u>7</u>	<u>Serving populations or geographies with limited nonprofit coverage.</u>
<u>Track Record</u>	<u>6</u>	<u>Years of operation, smoothly interpolated.</u>
<u>Funding Gap</u>	<u>5</u>	<u>Smaller organizations with greater funding gaps score higher.</u>

RISK — DEDUCTIONS UP TO -10

<u>Trigger</u>	<u>Deduction</u>	<u>Source we check</u>
<u>Program expense ratio below 50%</u>	<u>-5</u>	<u>IRS Form 990</u>
<u>Board smaller than 3 members</u>	<u>-5</u>	<u>Form 990 / Candid</u>
<u>Operating reserves under 1 month</u>	<u>-2</u>	<u>Form 990</u>

Deductions are size-adjusted: emerging organizations (<\$1M revenue) are not penalized for *missing* data, while established organizations (>\$10M) receive full deductions. Operating in conflict zones is never penalized.

DATA CONFIDENCE — 0 TO 1, DISPLAYED BESIDE THE SCORE

Verification 50% (third-party evaluation by Charity Navigator/Candid), transparency 35% (Candid seal level, audited financials), data quality 15% (consistency across sources). This is not part of the 100-point score — it tells donors how much verified information sits beneath it.

Your Impact scorecard

<u>Component</u>	<u>Your score</u>	<u>Status</u>	<u>What we saw</u>
<u>Cost Per Beneficiary</u>	<u>0/6</u>	<u>Missing data</u>	<u>Insufficient data for cost-per-beneficiary calculation</u>
<u>Directness</u>	<u>4/5</u>	<u>Strong</u>	<u>Delivery model: Capacity Building</u>
<u>Financial Health</u>	<u>0/7</u>	<u>Missing data</u>	<u>Working capital: unknown (UNKNOWN)</u>
<u>Program Ratio</u>	<u>0/5</u>	<u>Missing data</u>	<u>Program expense ratio: unknown</u>
<u>Evidence & Outcomes</u>	<u>2/10</u>	<u>Missing data</u>	<u>Evidence & outcomes: REPORTED (emerging org baseline)</u>
<u>Theory of Change</u>	<u>5/7</u>	<u>Partial</u>	<u>Theory of change: DEVELOPING</u>
<u>Governance</u>	<u>5/10</u>	<u>Partial</u>	<u>Board governance: baseline (2 members, emerging org)</u>

Your Alignment scorecard

<u>Component</u>	<u>Your score</u>	<u>Status</u>	<u>What we saw</u>
<u>Muslim Donor Fit</u>	<u>10/19</u>	<u>Partial</u>	<u>Accepts zakat (+2); Muslim-focused organization (+2); Islamic identity (+1); Asnaf: fi_sabilillah (+5)</u>
<u>Cause Urgency</u>	<u>4/13</u>	<u>Strong</u>	<u>Cause area: Religious Cultural (4/13)</u>
<u>Underserved Space</u>	<u>0/7</u>	<u>Partial</u>	<u>Well-covered space with mainstream reach</u>
<u>Track Record</u>	<u>6/6</u>	<u>Strong</u>	<u>Founded 1969 (57 years — 6/6)</u>
<u>Funding Gap</u>	<u>3/5</u>	<u>Partial</u>	<u>Revenue: unknown (moderate gap assumed)</u>

Gaps to close

We identified **up to 26 points** of headroom, ranked by potential gain. The last column tells you exactly where our pipeline reads the evidence — if you already do these things but don't publish them there, publishing is the entire fix.

<u>Priority</u>	<u>Component</u>	<u>Currently</u>	<u>Potential gain</u>	<u>What to do</u>	<u>Where we'll read it</u>
<u>1</u>	<u>Muslim Donor Fit (Alignment)</u>	<u>10/19</u>	<u>+8</u>	<u>Clarify zakat allocation policy and eligible use categories for donors.</u>	<u>Zakat page and policy on your website</u>
<u>2</u>	<u>Evidence & Outcomes (Impact)</u>	<u>2/10</u>	<u>+6</u>	<u>Seek external evaluation or track outcomes over at least 3 years.</u>	<u>Outcome reports / external evaluations on your website</u>
<u>3</u>	<u>Financial Health (Impact)</u>	<u>0/7</u>	<u>+4</u>	<u>Publish current reserve levels and a board-approved reserve policy (often 3-12 months for most nonprofits).</u>	<u>IRS Form 990 (reserves) + a published reserve policy</u>
<u>4</u>	<u>Cost Per Beneficiary (Impact)</u>	<u>0/6</u>	<u>+3</u>	<u>Publish beneficiary counts consistently so cost-effectiveness can be assessed.</u>	<u>Beneficiary counts on your website / annual report</u>
<u>5</u>	<u>Underserved Space (Alignment)</u>	<u>0/7</u>	<u>+3</u>	<u>Expand services to underserved populations or geographies with limited nonprofit coverage.</u>	<u>Program + geography descriptions on your website</u>
<u>6</u>	<u>Theory of Change (Impact)</u>	<u>5/7</u>	<u>+2</u>	<u>Document a clear theory of change with an explicit causal pathway.</u>	<u>Program pages on your website</u>

Risk deductions

Current deduction: –5 (risk level: ELEVATED).

- Operational, high severity: Board too small: 2 members (source: Candid profile)

Data confidence

Your data-confidence badge is **LOW**. This sits outside the score itself — it tells donors how much verified information underpins your evaluation. The three signals:

<u>Signal</u>	<u>Level</u>	<u>Value</u>
<u>Verification (50%)</u>	<u>NONE</u>	<u>0.00</u>
<u>Transparency (35%)</u>	<u>BRONZE</u>	<u>0.29</u>
<u>Data quality (15%)</u>	<u>MODERATE</u>	<u>0.67</u>

To raise it:

- Submit for a Charity Navigator evaluation and keep your Candid (GuideStar) profile current — third-party verification is half of the data-confidence signal.
- Work toward a Candid Gold or Platinum transparency seal and publish audited financials on your website.
- Publish consistent program descriptions, beneficiary counts, and financial detail across your website and IRS filings so sources corroborate each other.

What's working in your favor

- Verified zakat-eligible status with clear policies for distribution to valid asnaf categories
- Comprehensive service model including weekend schools, Quran distribution, and funeral management

From our analysts

- Limited availability of standardized financial metrics and third-party evaluations
- Low data confidence due to missing granular financial reporting in public databases

Correcting or updating our data

Corrections follow a defined process, not an inbox black hole:

1. **Tell us what's wrong** — contact us via goodmeasuregiving.org with the data point, what it should be, and where the correct value is published.
2. **We triage into one of three lanes.** *We misread a source* → we correct the pipeline and re-crawl. *The data isn't public yet* → you publish it (the Sources table above shows where we read each field), then we re-run. *You dispute the methodology* → it's logged in our public issue tracker and considered for the next rubric version.
3. **Your evaluation is re-run end-to-end** — not hand-edited. Scores only ever come from the pipeline.

4. **Every change is version-controlled.** Our database keeps a full audit history of every value, every score, and every re-run — we can show you exactly what changed and when.

Re-evaluations are typically completed within two weeks of a verified correction.

This report is informational, generated from public data as of the date above. Scores change as data changes. The ZAKAT-ELIGIBLE tag records a verifiable public claim by your organization, not a fiqh ruling — zakat eligibility judgments belong to donors and the scholars they consult. Methodology: goodmeasuregiving.org/methodology.
