PREPARED FOR THE LEADERSHIP OF BLOOM CHARITY NFP · GOOD MEASURE GIVING ·
GOODMEASUREGIVING.ORG

Good Measure Giving is a charity-evaluation platform for Muslim donors. This report shows exactly what donors see: where every data point came from, the full scoring rubric, and the specific gaps between your current score and the points available to you. Every gap is closable with information you control.

01 GAPS TO CLOSE

We identified **up to 2 points** of headroom, ranked by potential gain. The last column shows exactly where our pipeline reads the evidence — if you already do these things but don't publish them there, publishing is the entire fix.

#	COMPONENT	NOW	GAIN	WHAT TO DO	WHERE WE'LL READ IT
1	Financial Health Impact	5/7	+2	If reserves are above policy target, document why and publish triggers for planned deployment.	IRS Form 990 (reserves) + a published reserve policy

02 YOUR SCORECARD

Impact

COMPONENT	SCORE	STATUS	WHAT WE SAW
Cost Per Beneficiary	0/13	Low	A cost below \$1/beneficiary usually means beneficiary counts are inflated or double-counted. — beneficiary count likely inflated
Directness	5/5	Strong	Delivery model: Direct Service
Financial Health	5/7	Partial	Working capital: 21.3 months (HIGH)
Program Ratio	5/5	Strong	Program expense ratio: 99%
Evidence & Outcomes	4/5	Strong	Evidence & outcomes: TRACKED

Governance	5/10	Partial	Board governance: MINIMAL (3 members)

Alignment

COMPONENT	SCORE	STATUS	WHAT WE SAW
Muslim Donor Fit	18/19	Strong	Explicit zakat program (+4); Muslim-focused organization (+2); Asnaf: fuqara (+5); Operates in Muslim-majority regions (+3); Strong humanitarian service (+4)
Cause Urgency	13/13	Strong	Cause area: Humanitarian (13/13)
Underserved Space	7/7	Strong	Niche cause: UNKNOWN (+4); Serves underserved populations (+3)

COMPONENT	SCORE	STATUS	WHAT WE SAW
Track Record	4/6	Partial	Founded 2017 (9 years — 4/6)
Funding Gap	5/5	Strong	Revenue: \$551,810 (5/5 funding gap)

Risk deductions

Current deduction: **—o** (risk level: LOW).

- **Impact, medium severity:** Cost per beneficiary is \$0.39 — implausibly low (source: Reconciliation)

Data confidence

Your badge is **HIGH**. This sits outside the score itself — it tells donors how much verified information underpins the evaluation.

SIGNAL	LEVEL	VALUE
Verification (50%)	MODERATE	0.70
Transparency (35%)	PLATINUM	1.00
Data quality (15%)	HIGH	1.00

To raise it:

- Submit for a Charity Navigator evaluation and keep your Candid (GuideStar) profile current — third-party verification is half of the data-confidence signal.

03 WHERE OUR DATA COMES FROM

Every figure in this report traces to a public source. If anything here is wrong or stale, the correction process in section 06 exists exactly for that.

Zakat claim — the evidence we recorded:

Dedicated zakat page found at bloomcharity.org/donate (Source: bloomcharity.org/donate)

External evaluations and recognitions we found: Grant (The Giant Steps Foundation)

Order of precedence when sources disagree

DATA DOMAIN	PRECEDENCE (FIRST WINS)
Financial data (revenue, expenses, assets)	IRS Form 990 (ProPublica) → Charity Navigator
Third-party ratings	Charity Navigator only

DATA DOMAIN	PRECEDENCE (FIRST WINS)
Programs & mission	Candid → your website → Charity Navigator
Transparency signals	Candid → Charity Navigator
Cause classification	Candid → Charity Navigator → IRS NTEE → your website
Location	IRS Form 990 → Charity Navigator → Candid
CEO compensation	Charity Navigator → IRS Form 990 aggregate
Zakat acceptance	Your website only — explicit evidence required (a zakat page, fund, or policy); inferred claims are rejected

Fields prone to unreliable automated extraction (zakat claims, beneficiary counts, external evaluations, endorsements) additionally require corroborating evidence before they affect any score — an uncorroborated claim is treated as absent, never guessed.

04 ALL VALUES, ALL SOURCES — INCLUDING WHERE THEY DISAGREE

Sources don't always agree — different fiscal years, stale profiles, or genuine errors. Rather than hide that, this matrix shows every value from every source; conflict rows are tinted and marked.

Conflicts and how we resolved them

- **Tax / fiscal year**  IRS 990 (ProPublica): 2023; Charity Navigator: 2024; Form 990 grants: 2024
- **Total revenue**  IRS 990 (ProPublica): \$158,297; Charity Navigator: \$551,810; Form 990 grants: \$551,810 → **we use \$158,297** (from Form 990 (2023), per precedence)
- **Total expenses**  IRS 990 (ProPublica): \$99,381; Charity Navigator: \$578,892; Form 990 grants: \$578,892
- **Total assets**  IRS 990 (ProPublica): \$176,519; Charity Navigator: \$115,456
- **NTEE code**  IRS 990 (ProPublica): O12; Candid: R28 → **we use O12** (from ProPublica Form 990, per precedence)

Financial figures that differ across sources usually reflect different filing years (see the Tax / fiscal year row) rather than errors — each source updates on its own schedule. Where a conflict is not a fiscal-year artifact, the correction process below applies.

05 THE SCORING RUBRIC, IN FULL

We publish the rubric in full so nothing about your score is a black box. Rubric v5.0.0; the same rules apply to every organization in our database.

Impact — 50 points, weighted for your archetype: Direct Service

Organizations delivering direct humanitarian aid, medical services, or basic needs. Weights vary by archetype so an advocacy organization is not graded on meals served.

COMPONENT	WEIGHT	YOU SCORED
Cost Per Beneficiary	13	0
Directness	5	5
Financial Health	7	5
Program Ratio	5	5
Evidence & Outcomes	5	4
Theory of Change	5	5
Governance	10	5

Governance carries a 10-point floor in every archetype.

Alignment — 50 points, fixed for all organizations

COMPONENT	MAX	HOW POINTS ARE EARNED
Muslim Donor Fit	19	Layered: explicit zakat program +4 (or accepts zakat +2), Muslim-focused organization +2, Islamic identity +1, serving a named asnaf category +5, Muslim-majority regions +3, humanitarian service +4. Capped at 19.
Cause Urgency	13	Fixed points by detected cause area; humanitarian relief highest.
Underserved Space	7	Serving populations or geographies with limited nonprofit coverage.
Track Record	6	Years of operation, smoothly interpolated.
Funding Gap	5	Smaller organizations with greater funding gaps score higher.

Risk — deductions up to -10

TRIGGER	DEDUCTION	SOURCE WE CHECK
Program expense ratio below 50%	-5	IRS Form 990

TRIGGER	DEDUCTION	SOURCE WE CHECK
Board smaller than 3 members	-5	Form 990 / Candid
Operating reserves under 1 month	-2	Form 990

Deductions are size-adjusted: emerging organizations (<\$1M revenue) are not penalized for missing data; established organizations (>\$10M) receive full deductions. Conflict-zone operations are never penalized.

Data confidence — verification 50% (Charity Navigator/Candid evaluation), transparency 35% (Candid seal, audited financials), data quality 15% (consistency across sources). Not part of the 100-point score.

06 ANALYST NOTES

What's working in your favor

- Exceptional program expense ratio of 98.7%, ensuring nearly all funds directly support children [1].
- Highly efficient fundraising operations, spending only \$0.01 to raise every \$1 [1].
- Strong liquidity with 21.3 months of working capital available to sustain operations [1].

Areas our analysts flagged

- Enhancing third-party impact measurement to further validate long-term developmental outcomes.
- Expanding geographic reach beyond current primary project sites to serve more children in crisis.

07 CORRECTING OR UPDATING OUR DATA

A DEFINED PROCESS, NOT AN INBOX BLACK HOLE

1. **Tell us what's wrong** — via goodmeasuregiving.org, with the data point, what it should be, and where the correct value is published.
2. **We triage into one of three lanes.** We misread a source → we fix the pipeline and re-crawl. The data isn't public yet → you publish it (section 03 shows where we read each field), then we re-run. You dispute the methodology → logged in our public issue tracker for the next rubric version.
3. **Your evaluation is re-run end-to-end** — never hand-edited. Scores only ever come from the pipeline.
4. **Every change is version-controlled** — we can show you exactly what changed and when.

Re-evaluations run periodically; verified corrections are reflected in the next evaluation cycle.

HOW TO UPDATE WHAT WE SEE

Your website: publish your zakat policy, program outcomes, beneficiary counts, board composition, and annual reports where a crawler can find them. **Candid:** keep your profile current — Gold/Platinum seals feed the transparency signal. **Charity Navigator:** an up-to-date evaluation feeds verification. **IRS Form 990:** file on time — we read ratios, reserves, and governance from it. Then contact us and we'll re-run your evaluation.

This report is informational, generated from public data as of the date above. Scores change as data changes. The ZAKAT-ELIGIBLE tag records a verifiable public claim by your organization, not a fiqh ruling — zakat eligibility judgments belong to donors and the scholars they consult.
