RISK DEDUCTION

-5 / -10

DATA CONFIDENCE: LOW

Good Measure Giving is a charity-evaluation platform for Muslim donors. This report shows exactly what donors see: where every data point came from, the full scoring rubric, and the specific gaps between your current score and the points available to you. Every gap is closable with information you control.

01 GAPS TO CLOSE

We identified **up to 26 points** of headroom, ranked by potential gain. The last column shows exactly where our pipeline reads the evidence — if you already do these things but don't publish them there, publishing is the entire fix.

#	COMPONENT	NOW	GAIN	WHAT TO DO	WHERE WE'LL READ IT
1	Muslim Donor Fit Alignment	10/19	+8	Clarify zakat allocation policy and eligible use categories for donors.	Zakat page and policy on your website
2	Evidence & Outcomes Impact	2/10	+6	Seek external evaluation or track outcomes over at least 3 years.	Outcome reports / external evaluations on your website
3	Financial Health Impact	0/7	+4	Publish current reserve levels and a board-approved reserve policy (often 3-12 months for most nonprofits).	IRS Form 990 (reserves) + a published reserve policy
4	Cost Per Beneficiary Impact	0/6	+3	Publish beneficiary counts consistently so cost-effectiveness can be assessed.	Beneficiary counts on your website / annual report
5	Underserved Space Alignment	0/7	+3	Expand services to underserved populations or geographies with limited nonprofit coverage.	Program + geography descriptions on your website
6	Theory of Change Impact	5/7	+2	Document a clear theory of change with an explicit causal pathway.	Program pages on your website

02 YOUR SCORECARD

Impact

Component	Score	Status	What we saw
Cost Per Beneficiary	0/6	Missing data	Insufficient data for cost-per-beneficiary calculation
Directness	4/5	Strong	Delivery model: Capacity Building
Financial Health	0/7	Missing data	Working capital: unknown (UNKNOWN)
Program Ratio	0/5	Missing data	Program expense ratio: unknown
Evidence & Outcomes	2/10	Missing data	Evidence & outcomes: REPORTED (emerging org baseline)
Theory of Change	5/7	Partial	Theory of change: DEVELOPING
Governance	5/10	Partial	Board governance: baseline (2 members, emerging org)

Alignment

Component	Score	Status	What we saw
Muslim Donor Fit	10/19	Partial	Accepts zakat (+2); Muslim-focused organization (+2); Islamic identity (+1); Asnaf: fi_sabilillah (+5)
Cause Urgency	4/13	Strong	Cause area: Religious Cultural (4/13)
Underserved Space	0/7	Partial	Well-covered space with mainstream reach
Track Record	6/6	Strong	Founded 1969 (57 years — 6/6)
Funding Gap	3/5	Partial	Revenue: unknown (moderate gap assumed)

Risk deductions

Current deduction: **-5** (risk level: ELEVATED).

- Operational, high severity:** Board too small: 2 members (source: Candid profile)

Data confidence

Your badge is **LOW**. This sits outside the score itself — it tells donors how much verified information underpins the evaluation.

Signal	Level	Value
Verification (50%)	NONE	0.00
Transparency (35%)	BRONZE	0.29
Data quality (15%)	MODERATE	0.67

To raise it:

- Submit for a Charity Navigator evaluation and keep your Candid (GuideStar) profile current — third-party verification is half of the data-confidence signal.
- Work toward a Candid Gold or Platinum transparency seal and publish audited financials on your website.

- Publish consistent program descriptions, beneficiary counts, and financial detail across your website and IRS filings so sources corroborate each other.

Every figure in this report traces to a public source. If anything here is wrong or stale, the correction process in section 06 exists exactly for that.

DATA POINT	VALUE WE READ	SOURCE	RETRIEVED
Candid transparency seal	bronze	Candid	2026-03-09
Zakat acceptance claim	Yes	Charity Website	2026-03-07
Founded year	1969	Charity Website	2026-03-07
Audited financials	No	Charity Website	2026-03-07
NTEE classification	X40	ProPublica Form 990	2026-03-09
Transparency score	50	Candid Bronze Seal	2026-03-09

Source links — app.candid.org/profile/7145445 · isgh.org/assistance · isgh.org/wp-content/uploads/2022/09/2... · projects.propublica.org/nonprofits/or...

Zakat claim – the evidence we recorded:

In 2024, ISGH was among the largest providers of financial assistance in our community with over \$4.9M in Zakat and Sadaqah distributions. Additionally, their website offers 'Zakat-Ul-Maal' as a specific online giving option, and they have a formal 'ISGH Assistance Application' for evaluating Zakat requests. (Source: isgh.org/assistance)

External evaluations and recognitions we found: ISNA 2018 Green Masjid Award (Islamic Society of North America (ISNA)); Houston Mayor's Proud Partner Award (Houston Mayor's Office)

Order of precedence when sources disagree

DATA DOMAIN	PRECEDENCE (FIRST WINS)
Financial data (revenue, expenses, assets)	IRS Form 990 (ProPublica) → Charity Navigator
Third-party ratings	Charity Navigator only
Programs & mission	Candid → your website → Charity Navigator
Transparency signals	Candid → Charity Navigator
Cause classification	Candid → Charity Navigator → IRS NTEE → your website
Location	IRS Form 990 → Charity Navigator → Candid
CEO compensation	Charity Navigator → IRS Form 990 aggregate
Zakat acceptance	Your website only — explicit evidence required (a zakat page, fund, or policy); inferred claims are rejected

Fields prone to unreliable automated extraction (zakat claims, beneficiary counts, external evaluations, endorsements) additionally require corroborating evidence before they affect any score — an uncorroborated claim is treated as absent, never guessed.

04 ALL VALUES, ALL SOURCES — INCLUDING WHERE THEY DISAGREE

Sources don't always agree — different fiscal years, stale profiles, or genuine errors. Rather than hide that, this matrix shows every value from every source; conflict rows are tinted and marked.

FIELD	IRS 990 (PROPUBICA)	CHARITY NAVIGATOR	CANDID	YOUR WEBSITE	FORM 990 GRANTS
Board size	.	—	2	.	.
IRS ruling year	2015	—	2015	.	.
Founded year (self-reported)	.	.	.	1969	.
NTEE code	X40	.	X40	.	.
Candid seal	.	.	bronze	.	.
Accepts zakat (explicit evidence)	.	.	.	Yes	.

— = source has no value · “.” = source doesn't report this field

No conflicting values across sources for the fields above.

We publish the rubric in full so nothing about your score is a black box. Rubric v5.0.0; the same rules apply to every organization in our database.

Impact — 50 points, weighted for your archetype: Community

Community-serving organizations — congregations, social services, outreach. Weights vary by archetype so an advocacy organization is not graded on meals served.

COMPONENT	WEIGHT	YOU SCORED
Cost Per Beneficiary	6	0
Directness	5	4
Financial Health	7	0
Program Ratio	5	0
Evidence & Outcomes	10	2
Theory of Change	7	5
Governance	10	5

Governance carries a 10-point floor in every archetype.

Alignment — 50 points, fixed for all organizations

COMPONENT	MAX	HOW POINTS ARE EARNED
Muslim Donor Fit	19	Layered: explicit zakat program +4 (or accepts zakat +2), Muslim-focused organization +2, Islamic identity +1, serving a named asnaf category +5, Muslim-majority regions +3, humanitarian service +4. Capped at 19.
Cause Urgency	13	Fixed points by detected cause area; humanitarian relief highest.
Underserved Space	7	Serving populations or geographies with limited nonprofit coverage.
Track Record	6	Years of operation, smoothly interpolated.
Funding Gap	5	Smaller organizations with greater funding gaps score higher.

Risk — deductions up to –10

TRIGGER	DEDUCTION	SOURCE WE CHECK
Program expense ratio below 50%	–5	IRS Form 990
Board smaller than 3 members	–5	Form 990 / Candid
Operating reserves under 1 month	–2	Form 990

Deductions are size-adjusted: emerging organizations (<\$1M revenue) are not penalized for missing data; established organizations (>\$10M) receive full deductions. Conflict-zone operations are never penalized.

Data confidence — verification 50% (Charity Navigator/Candid evaluation), transparency 35% (Candid seal, audited financials), data quality 15% (consistency across sources). Not part of the 100-point score.

06 ANALYST NOTES

GOOD MEASURE GIVING · goodmeasuregiving.org

Score report · Islamic Society of Greater Houston · 2026-06-07

What's working in your favor

- Verified zakat-eligible status with clear policies for distribution to valid asnaf categories
- Comprehensive service model including weekend schools, Quran distribution, and funeral management

Areas our analysts flagged

- Limited availability of standardized financial metrics and third-party evaluations
- Low data confidence due to missing granular financial reporting in public databases

07 CORRECTING OR UPDATING OUR DATA

A DEFINED PROCESS, NOT AN INBOX BLACK HOLE

1. **Tell us what's wrong** — via goodmeasuregiving.org, with the data point, what it should be, and where the correct value is published.
2. **We triage into one of three lanes.** We misread a source → we fix the pipeline and re-crawl. The data isn't public yet → you publish it (section 03 shows where we read each field), then we re-run. You dispute the methodology → logged in our public issue tracker for the next rubric version.
3. **Your evaluation is re-run end-to-end** — never hand-edited. Scores only ever come from the pipeline.
4. **Every change is version-controlled** — we can show you exactly what changed and when.

Re-evaluations are typically completed within two weeks of a verified correction.

HOW TO UPDATE WHAT WE SEE

Your website: publish your zakat policy, program outcomes, beneficiary counts, board composition, and annual reports where a crawler can find them. **Candid:** keep your profile current — Gold/Platinum seals feed the transparency signal. **Charity Navigator:** an up-to-date evaluation feeds verification. **IRS Form 990:** file on time — we read ratios, reserves, and governance from it. Then contact us and we'll re-run your evaluation.

This report is informational, generated from public data as of the date above. Scores change as data changes. The ZAKAT-ELIGIBLE tag records a verifiable public claim by your organization, not a fiqh ruling — zakat eligibility judgments belong to donors and the scholars they consult. Methodology: goodmeasuregiving.org/methodology.
